LOS COLORES Y TEXTURAS MOSTRADOS EN ESTE CATALOGO SON APROXIMADOS.
THE COLORS AND TEXTURES SHOWN IN THIS CATALOG ARE APPROXIMATE.

Global is the new melamine catalogue by **Losán**: a journey through touch and sight in which you will discover the new designs of melamines that we are launching in 2018.

Global integrates the latest novelties in unicolours, fantasies and woods; it incorporates new finishes that add relief to the melamines as if it were an orography map; and, of course, it follows the latest trends in design and interiors.

Losán is a Spanish company dedicated to the manufacture of products that come from wood for the furniture and decoration industry. Amongst other products, we manufacture melamine boards, by direct application of impregnated papers on a base board, in which adhesion is achieved by the simultaneous action of pressure and heat.

THE BOARDS

- > **Standard Particle Board**: interior applications (including furniture) in a dry environment [Type P2].
- > **Moisture Resistant Particle Board**: non-structural board for use in a humid environment [Type P3].
- > **Fireproof Particle Board**: board with fire reaction classification certificate [B-s1-d0 or B-s2-d0].
- > **Standard MDF**: medium density fibreboard for general use in a dry environment [Type MDF.LA].
- > **Moisture Resistant MDF**: non-structural medium density fibreboard for use in a humid environment [Type MDF.H].
- > **Flame retardant MDF**: medium density fibreboard with fire reaction classification certificate [B-s2-d0].
- > **Plywood**: birch plywood 100% class III for outdoor use.

Other types of boards with different properties can be used: water proof - flame retardant simultaneously, high and low density, structural and non-structural, etc.

THE TYPES OF MELAMINES

- > **Standard melamine board**: suitable for interiors and furniture manufacturing.
- > **Duplo melamine board**: two melamine papers on each of their faces = greater surface consistency.
- > **Lacquered melamine board**: varnished surface = same visual and tactile sensation of varnished natural wood.
- > **Flame retardant melamine board**: optimal behaviour in fire situations.
- > **Antibacterial melamine board**: inhibits the growth of microorganisms on its surface = suitable for use in hospitals, nurseries, toilets, rooms dedicated to food handling, etc.

Global es el nuevo catálogo de melaminas de **Losán**: un viaje a través del tacto y la vista en el que recorrerás los diseños de melaminas que lanzamos para el año 2018.

Global integra las últimas novedades en unicolores, fantasías y maderas; incorpora nuevos acabados que aportan relieve a las melaminas como si se tratase de un mapa de orografía; y por supuesto, sigue las últimas tendencias en diseño e interiores.

Losán es una empresa española dedicada a la fabricación de productos derivados de la madera destinada a la industria del mueble, la decoración y el equipamiento. Entre otros productos, fabricamos tableros de melaminas por aplicación directa de papeles impregnados sobre un tablero soporte, donde se consigue la adherencia por la acción simultánea de presión y calor sin aplicación de adhesivo.

LOS SOPORTES

- > **Aglomerado estándar**: aplicaciones de interior (incluyendo mobiliario) en ambiente seco [Tipo P2].
- > **Aglomerado hidrófugo**: tablero no estructural para utilización en ambiente húmedo [Tipo P3].
- > **Aglomerado ignífugo**: tablero con certificado de clasificación de reacción al fuego [B-s1-d0 o B-s2-d0].
- > **MDF estándar**: tablero de fibras de densidad media para utilización general en ambiente seco [Tipo MDF.LA].
- > **MDF hidrófugo**: tablero de fibras de densidad media no estructural para utilización en ambiente húmedo [Tipo MDF.H].
- > **MDF ignífugo**: tablero de fibras de densidad media con certificado de clasificación de reacción al fuego [B-s2-d0].
- > **Contrachapado**: tablero contrachapado de abedul 100% clase III para uso exterior.

Se pueden utilizar otros tipos de soportes con propiedades diferentes: hidrófugo-ignífugo simultáneamente, alta y baja densidad, estructural y no estructural, etc.

LOS TIPOS DE MELAMINAS

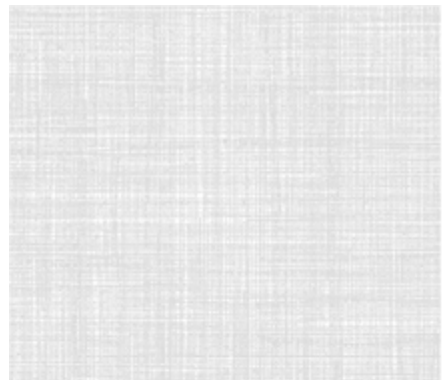

- > **Tablero de melamina estándar**: adecuado para interiores y fabricación de muebles.
- > **Tablero de melamina Duplo**: dos papeles melamínicos en cada una de sus caras = mayor consistencia superficial.
- > **Tablero de melamina barnizable**: superficie barnizadas = misma sensación visual y táctil que la madera natural barnizada.
- > **Tablero de melamina ignífugo**: comportamiento óptimo en situación de incendio.
- > **Tablero de melamina antibacterias**: inhibe el crecimiento de microorganismos en su superficie = apto para uso en hospitales, guarderías, aseos, estancias dedicadas a la manipulación de alimentos, etc.
